Dear Dr Nati,

I write this letter to confirm that the Atacama Cosmology Telescope (ACT) collaboration would be delighted to use the ACT instrument to make observations of your precision polarization angle calibrator to provide absolute angle calibration of the detectors. We will work with you to coordinate the best times for observations, make sure you have full access to the resulting data, and provide support to you and your team in analyzing the ACT data.

We very much look forward to the success of this project and our continued collaboration.

A handwritten signature in blue ink, appearing to read 'S. Staggs', with a stylized, cursive script.
