Dear Dr Nati,

I write this letter to confirm that the POLARBEAR/Simons Array collaboration has strong interest to make observations of your precision polarization angle calibrator, POLOCALC, to provide absolute angle calibration of the detectors for the 3 Simons Array telescopes in Atacama Chile. We will work with you to coordinate the best times for observations and ensure that you have full access and support to analyze the resulting telescope data.

Sincerely,

A handwritten signature in cursive script that reads "Adrian T. Lee".

Adrian T. Lee
Professor of Physics
NSF Principal Investigator for
POLARBEAR /Simons Array Project
