Dear Dr Nati,

I write this letter to confirm that the Simons Observatory (SO) collaboration would be delighted to use the SO instrument to make observations of your precision polarization angle calibrator to provide absolute angle calibration of the detectors. We will work with you to coordinate the best times for observations and the analysis of the resulting SO calibration data.

We very much look forward to the success of this project and our continued collaboration.

A handwritten signature in blue ink, appearing to read 'S. Staggs', with a stylized flourish at the end.

Suzanne Staggs, Spokesperson of Simons Observatory
